Treasure your health

Prevention • Detection • Enhancement

Raffles Health Screening

Treasure Your Health

Prevention. Detection. Enhancement.

Health screening plays an important role in the early detection of diseases and conditions that may lead to serious health complications, disability or even death. Modern lifestyles and stress can negatively impact our health, increasing the risk of conditions such as heart disease, diabetes, hypertension and cancer. Regular health screenings can help detect these conditions early, often before symptoms become apparent.

At **Raffles Health Screeners**, our dedicated team of healthcare professionals is committed to helping you better understand and take charge of your health. Our comprehensive screening services are available to both individuals and corporate employees.

Following your screening, a personalised medical report will be emailed to you. Your doctor will review the results with you during a private consultation, explain any findings and provide recommendations tailored to your health profile.

Regular health evaluations can help identify potential health risks early, enabling timely diagnosis and intervention. Taking a proactive approach to your health can support better disease management, improve overall well-being and help you work towards your lifestyle goals.

With over 40 years of experience, Raffles Health Screeners provides holistic and personalised health screening services at our executive health screening centres across Singapore. Our team is dedicated to making your screening experience comfortable, efficient and worthwhile. Complimentary Wi-Fi is also available, allowing you to stay connected or attend to your business needs during your visit.

Advanced Imaging at Raffles Hospital

Raffles Hospital, a tertiary care facility, is equipped with advanced imaging technologies, including:

- Computed tomography (CT) scanning
- Magnetic resonance imaging (MRI)
- Positron emission tomography (PET)

During your consultation, you can discuss any health concerns with our doctors. Where appropriate, they can arrange for advanced imaging to further investigate your concerns.

For more information or to schedule an appointment for any health screening package, please call our **24-hour hotline at 6311 1222**.

Packages available online

Enjoy greater convenience by selecting your preferred health screening package online.

- Select health screening package
- Receive e-invoice
- Get a call from us
- Book your appointment
- Go for screening
- Cashless check-out after completion of screening

  E-invoice is available upon checkout

$548

PHYSICAL EXAMINATION & ASSESSMENT

- Consultation & Physical Examination By Doctor
- Body Fat Measurement
- Height / Weight / BMI
- Waist Circumference
- Visual Acuity
- Medical Report (Electronic)
- Post Examination Review By Doctor
- 12-lead Resting Electrocardiogram (ECG)

LABORATORY ANALYSIS

- Complete Haematological Parameters
- Erythrocyte Sedimentation Rate (ESR)
- Liver Function Test
- Kidney Function Test
- Blood Glucose
- HbA1c (Diabetic Screening)
- Lipid/Cholesterol Profile (Measured)
- Gout (Uric Acid)
- Thyroid Screening:
- - Free T4
- - TSH
- Bone Mineral Status:
- - Calcium
- - Phosphate
- Tumour Marker - Liver (AFP)
- Tumour Marker - Colon (CEA)
- Tumour Marker - Ovary (CA 125) - Females
- Tumour Marker - Prostate (PSA) - Males
- Hepatitis A Screening
- Hepatitis B Screening
- HIV Screening
- Venereal Disease (VDRL / TPHA)
- B-HCG
- Measles Virus lgG
- Insulin
- Urinalysis
- Stool Occult Blood x 2
- Immunology: Rheumatoid Factor

Preparations

- Fast for at least eight hours. Please refrain from consuming food the night before your appointment. **Drinking of plain water is permissible.**
- Please delay your routine morning medication and / or supplements until your blood sample is taken. Bring along all medications for consumption after your blood test.
- For ladies - Urine and stool tests should be done at least five days after the last day of menstruation and before the next cycle.

  If you are menstruating on the day of your appointment, please inform the nurses on arrival. You will not be able to do your urine and stool tests because the presence of blood in these tests would produce inaccurate results.
- Fasting is mandatory for patients who will be undergoing the ultrasound abdomen test. While taking the test, you may feel some slight discomfort and the conducting gel may feel cold and wet.
- Before undergoing a pelvic ultrasound, you will be required to drink several glasses of water and to avoid urinating for about one hour prior to the examination time. When the bladder is full, it forms a convenient path, known as the acoustic window, for the ultrasonic waves.
- Do not wear any deodorant, perfume, powder, or cream under your arms or chest area as it may interfere with the quality of the mammogram. Please bring old mammographic films if you have any.
- If you are taking the treadmill test, bring along an additional change of clothes and appropriate footwear. Medications such as beta-blockers (e.g. propranolol or atenolol) should preferably be stopped three days before the test date.
- Patients are to fast for at least two hours before undergoing Mastocheck®.

Useful Information

GASTROClear

GASTROClear is the world's first molecular blood test for early detection of gastric cancer in high-risk populations.

The GASTROClear test provides information to help doctors identify patients who may benefit from detailed medical examinations to diagnose gastric cancer early, before symptoms appear.

Mastocheck®

Mastocheck® is a blood-based breast cancer detection test. Developed by South Korea-based Bertis, Mastocheck® is the world's first proteomics-based early diagnostic test for the disease. It is a convenient method that requires only a small amount of blood.

Multiphasic Blood Tests

A series of blood tests to screen conditions such as gout, thyroid, anaemia, leukaemia, diabetes, hepatitis, sexually transmitted diseases, rheumatoid arthritis, liver and kidney disorders, and high cholesterol (lipid screen).

Tumour Markers

A series of blood tests to detect cancer markers that may be produced by some cancer cells. These are available for liver, colon, pancreas, prostate, ovarian, and nose.

Urinalysis

A test to infer the state of kidney function as well as the urinary tract.

Stool Analysis

A test to screen for blood in the stool, a recognised manifestation of colorectal cancer (stool occult blood test) or for parasitic infection (stool FEME test).

SurePath™ Liquid-based Pap Test

The BD SurePath™ Liquid-based Pap Test is intended for use in the screening and detection of cervical cancer, precancerous lesions, and atypical cells. This test uses modern technology by removing debris such as blood, mucus, and inflammatory cells, aiding in visualisation of diagnostically relevant cells and reducing patient callbacks.

Cardiac Assessments

Screenings through resting ECG and treadmill stress test to assess for presence of coronary heart diseases.

Ultrasound Abdomen

Examines and detects any structural abnormalities of abdominal organs including the liver, gall bladder, spleen, pancreas, and kidneys.

Ultrasound Pelvis

Examines and detects the presence of any structural abnormalities in the pelvic organs such as the uterus and ovaries in women.

Ultrasound Thyroid

Examines and detects the presence of any structural abnormalities within the thyroid gland.

Ultrasound Scrotum / Testes

Examines and detects the presence of any structural abnormalities within the scrotal sac and testicles in men.

Ultrasound Kidneys

Examines and detects the presence of any structural abnormalities of the kidneys.

Ultrasound Hepatobiliary System (Liver)

Examines and detects the presence of any structural abnormalities of the liver and gall bladder.

Ultrasound Prostate

Examines and detects any enlargement, or growth within the prostate gland in men.

Breast Examination

- Ultrasound Breast
  Recommended for women before the **age of 40,** especially if you detect any breast changes. It is also useful to be added onto a mammogram screening to improve breast cancer detection rates.
- Mammogram
  An X-ray of the breasts for breast cancer screening. In Singapore, annual mammography screening is recommended for women **aged 40 to 49**, while women aged 50 and above should be screened every two years. If available, please bring any previous mammograms for comparison.

Tonometry

A test to assess the pressure of the eyeball and test for glaucoma.

Food Allergy Panels

- Raffles Allergy Exclusive Panel
  Dermatophagides pteronynssinus, dermatophagoides farina, blomia tropicalis, cat, dog, feather mix, egg white, sesame seed, soya bean, milk (pastuerized), crab, shrimps, wheat flour, cuttlefish, egg yolk, chicken, nut mix, shellfish mix, cockroach, mould fungi mix 1.
- Raffles Food Allergen
  Hazelnut, walnut, almond, milk, egg white, egg yolk, casein, potato, celery, carrot, tomato, cod fish, crab, orange, apple, wheat flour, rye flour, sesame seed, soya bean.
